CASE STUDY

River Street MSCP, Bedford Partnering Charter

PROJECT
River Street MSCP, Bedford

STRUCTURE
Reinforced Concrete Trough Slab ~ 440 Spaces

CLIENT
Bedford Borough Council

CONTRACT VALUE
Circa £1,400,000.00

CONTRACT DETAILS

The car park was the 2nd to be refurbished under the Council’s drive to provide modern parking facilities, in this Shopping Centre car park and to arrest the start of deterioration.

Works included concrete repairs, together with the use of surface applied corrosion inhibitor. Surfacing of all inter-decks with a coloured car decking system, including a fully elastomeric coating to the top deck and to the asphalt waterproofing over the shopping mall.

The soffit, columns and vertical walls had anti-carbonation coatings applied. The existing lighting system was fully upgraded and a pay on foot system installed.

New edge protection barrier systems were fitted where necessary.

Works were carried out under a Partnering Agreement.
