

STRUCTURES CASE STUDY

Multi-Phase Car Park Refurbishment

PROJECT

Gracechurch Shopping Centre
Car Park, Sutton Coldfield

STRUCTURE

Car Park

CLIENT

British Overseas Bank Nominees Ltd

CONTRACT VALUE

£842,000

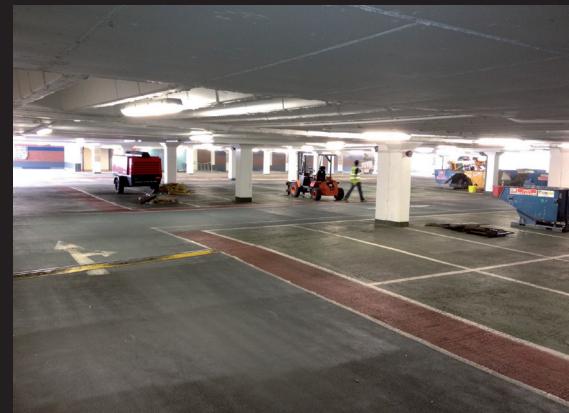

CONTRACT

This busy and popular multi-storey car park in Sutton Coldfield, West Midlands, required a major programme of concrete deck repairs and protection to levels 3 & 4 due to the failure of previous deck waterproofing treatments that had been applied several years before by a third party.

A change in ownership of the centre and its car park saw its name revert back to the original Gracechurch Shopping Centre having been known locally as 'The Mall' for a number of years.

Makers were recommended by the previous owners to the centre's new Asset Management team following the successful completion of two earlier phases of refurbishment on other decks in the car park carried out by Makers in previous years.

Makers were appointed to carry out this 3rd phase of works to levels 3 & 4 with the scope of works including some 550m² of concrete repairs to both levels prior to deck re-waterproofing to approximately 6,500m²
